Learning with **Accelerate Academy**

Wound management education for South West London Training Hub

These courses can count for participatory learning hours for continuing professional development or NMC revalidation

About your courses

These courses will support the continuous professional development needs of clinicians - each module can count for participatory learning hours for continuing professional development or NMC revalidation. Brief content for each course is given below.

1. Leg ulcer management one-day refresher - face to face

This workshop is suitable for those already trained in lower limb and leg ulcer management who are in need of an update

- Refresh your clinical assessment skills including ABPI / Doppler assessment
- Revisit how to skillfully apply inelastic bandage systems to manage lower limb ulceration and swelling
- Review how to measure for compression hosiery and wraps
- Discuss safety netting and escalation in infection or unusual aetiologies

2. Developing skills in leg ulcer management - A 3 day virtual course

This course is suitable for beginners

- Perform a holistic assessment of a patient presenting with a lower leg wound
- Identify whether the patient would be suitable for compression therapy by performing a vascular assessment (Doppler) to record ankle brachial pressure index (ABPI) and be able to interpret the results
- Identify the best options of compression therapy in partnership with the patient. Learners will understand the importance of correct application of the chosen method, such as compression wraps, bandages or hosiery

A limited number of places are available on this RCN accredited 3 day course. Email office.swith@nhs.net to request a place.

How the courses are run

The virtual sessions will be held using the MS Teams virtual learning environment (VLE) with informative webinars, discussion, Q & A and one to one sessions.

We have an Academy Moderator at Accelerate who can support you in digitally preparing for the course should you need assistance.

You will need to have access to a laptop, tablet or computer with video and sound capability so you can access the VLE effectively. You will also need peace and quiet.

We will be using the chat, break out and polling features of our VLE during the virtual courses to make the sessions interactive and we would ask you to participate as if in a face to face situation.

The face to face training in the classroom is a workshop containing an exciting mix of theoretical teaching, based on the most recent evidence based practice, as well as a practical bandaging workshop, so do attend ready to practice these skills on each other.
